HART'S

1935 Catalog

THE OLD APPLE TREE shown above was planted by Johnny Appleseed in one of his original nurseries near Ft. Wayne, Indiana, and not far from our own Nursery. It is still living but shows signs of decay after a life of more than a hundred years.

HART'S NURSERY - - Spencerville, Indiana

The Rock Garden and Flowers shown above won the Blue Ribbon for Hart's Nursery
At Ft. Wayne, Ind., Sept. 12, 1934.

HART'S GUARANTEE

WE GUARANTEE every Tree, Plant, or Vine sold by us to be strong, vigorous and healthy, and to deliver them to you in good condition. If, for any reason, you are not absolutely satisfied with your stock when it is received, advise us at once, and we will gladly replace the items or refund your money.

OUR BUSINESS METHOD

In looking at and studying catalogs for many years we are convinced that many statements made therein, are contradictory, and illustrations used, are over-drawn. We believe this is unfair to the buyer, and opposed to sound business methods.

Why lead people to believe you can make 12 to 15 hundred dollars profit from an acre of strawberries? We do not say this is impossible, but we do say it is improbable. Why not tell the buyer what he may reasonably expect if he gives his planting good care? Why say in your catalog that "Cumberland is the largest Raspberry grown," and in your description that "Logan is as large or Larger than Cumberland"? This catalog was written with these thoughts in mind. You will not be misled.

CLYDE E. HART

KARL V. HART

JUST 5 YEARS AGO we sent out our first catalog, only four hundred copies were printed and mailed to people in North-Eastern Indiana and North-Western Ohio.

We had no idea then that we would have customers and friends in nearly every state in the Union and be sending out several thousand catalogs.

Our business has not yet reached what you would call "a big business," but each year has seen an increase over that of the preceding one.

You will find all information and variety descriptions in this book accurate and dependable. We do not boost any variety of stock unless it will give good results, for we want you to keep ordering from us year after year.

In closing, we wish to extend our sincere thanks to the many customers who have so generously placed their orders with us in the past and made this business possible. We trust we may have the pleasure of serving you during the coming year.

Sincerely yours,

HART'S NURSERY,

THE 1935 OUTLOOK

MOST PARTS OF THE WEST and middle west experienced the worst drought during the year of 1934 known in recent years.

The statement, "Isn't God good to Indiana," was literally fulfilled during the past summer. This was especially true of North-Eastern Indiana where our nursery is located. The rains of early spring gave our plants a good start and by thorough cultivation and an occasional rain we have the best beds of plants we have ever produced.

There is a real shortage this year in good nursery stock. We feel that you should be made aware of this fact so that you can plan the purchase of your nursery requirements for the year to the best advantage.

Government figures show that strawberry production will be from 15 to 20 per cent less this year than that of 1934. The result of this reduction means higher prices for berries this year.

SECRETS

Of Successful Berry Culture

We are glad to tell any one the things we have learned in growing small fruit. There is one point that has not been stressed by nursery men. Unless your ground is low, and a springy type of soil, your plants should be planted much earlier than is the usual practice. Heavy frosts will not hurt them and they will stand light freezes. A snow on newly set plants is of great benefit.

Do you have trouble getting sufficient plants to make a fruiting row? Strawberry plants are made by the mother plant making new runners. If this new plant does not make roots soon after the new leaves are formed, the under side, where the root-lets form, becomes woody and no roots form. If the weather is damp or rainy no difficulty will be experienced, but if it is dry a little earth should be drawn to the plant and this difficulty will be overcome. These early plants are the most valuable plants for fruiting.

Here is one question asked more often than any other: "What shall I do with the blossoms that come on my newly set plants?" Wait until about half the berries have begun to develop, then cut off the berries and remaining blossoms. You may have to go over them once more in about a week, but you will find it time well spent.

ADVICE

Now here is our advice: Never go into a business on a big scale that you know little or nothing about. Go slowly. We would much rather sell you 100 plants and see you make a success than sell you 10,000 plants and have you make a failure.

We will be glad to advise you at any time on any matter pertaining to the raising of small fruit. Be free to write us.

We will have for sale approximately the following amount of plants

STRAWBERRY PLANTS

Premier	450,000	Beaver	30,000
Mastodon	150,000	Gibson	200,000
Pearl	35,000	Aroma	45,000
Dunlap	400,000	Other Varieties	80,000

RASPBERRY PLANTS

Cumberland	100,000	New Logan	30,000
Kansas	10,000	Plum Farmer	7,500
Latham (Red)	15,000	Columbian (Purple)	5,000

We do not claim to be the largest producer of plants in this country, but when quality is considered we are willing to compare our plants with those raised any where.

By growing all our plants it is possible to give them our personal supervision from the time the plants are set, till dug for your order. Our plants are kept thoroughly hoed and cultivated, not a weed is permitted to grow. Every plant that goes out is fresh dug. We have pleased others—we can please you.

Strawberry Plants that are not Drought Stunted

THE ST. JOE VALLEY

The St. Joe Valley, through which the St. Joe river flows, has become a hive of industry in the last few years in the production of small fruits, apples, melons and potatoes. The bluffs along the river and extending back some distance are made up of light sandy loam and is especially suited for berry plants.

The soil seems to be exactly suited to produce heavy crowns and long fibrous roots, which are essentials of a good strawberry plant.

Hundreds of acres of melons and cantaloupes are produced here which find a ready market in Cleveland, Akron, Cincinnati, and other eastern cities.

The Leighty and Widney orchards, among the largest in Indiana, are also located in the valley and produce thousands of bushels of apples each year.

Strawberries

PERFECTION has not been reached in anything. No strawberry is perfect, but like people, some come closer to it than others. We have attempted, with our experience, to tell you the virtues of each variety, as well as their faults.

Many people seem to think because varieties are new that they must be superior to the old. This is not always true. Certain kinds of wheat, for instance Pool, has been raised for years, and is still a standard variety, ranking far above some of the newer varieties. Reed's yellow dent corn is another variety that still ranks high among corn raisers, though many new varieties are on the market.

Nevertheless, we should always be on the lookout for newer and better varieties.

We list only Perfect Flowering Varieties. That is, you can plant all of our Strawberries alone and they will bear.

We sell 500 Strawberry Plants at the 1,000 rate.

PREMIER

THE MOST POPULAR BERRY—No strawberry in recent years has gained the popularity that has come to Premier. It has given more general satisfaction than any variety ever introduced—as a market berry it has outclassed all others, though not so well suited for long distance shipping as some other varieties.

When you come to earliness, size, shape, attractiveness, and quality it is hard to beat.

One essential in having a big crop of berries is to have good healthy foliage, without this no variety can produce a good crop. You will find the foliage on Premier just as green at the end of the picking season as at the beginning.

If Premier has any fault it is this: Many have difficulty in getting sufficient plants to make a wide row. They should be planted very early to overcome this difficulty.

We have a large acreage of Premier plants and you will make no mistake in planting liberally of this variety.

PRICE: 25 for 40c; 100 for \$1.10, prepaid. 1,000 for \$6.50, not prepaid.

SENATOR DUNLAP

THE DARK COLORED BERRY—Senator Dunlap has been a household word for many years. It is referred to as "That dark red berry." It is not, however, planted so extensively as it was a few years ago, but when it comes to quality and color no other berry can equal it.

Those who wish to grow berries for use in the home can find nothing that equals Dunlap.

The fault with this variety is that it is too productive of plants and in dry weather the berries have a tendency to become small as the season advances.

The plants should be planted much farther apart than such varieties as Premier, Cooper and Gibson, and the rows kept narrowed down by cutting off the new plants after the row is of sufficient width.

If you have never grown strawberries try Dunlap. You can not fail with them. We have a fine stock of plants of this variety.

PRICE: 25 for 30c; 100 for 90c, prepaid. 1,000 for \$4.25, not prepaid.

GIBSON

THE HEAVIEST ROOTED PLANT—Gibson is another of the old favorites. They make a wide row of dark green plants, the leaves look like they had been varnished. The berries are very large, handsome in appearance and very sweet. They are valuable for canning and preserving. The berries grow on very short stems, and should be mulched with straw so they may be kept clean.

No plant produces such long roots as Gibson, and they can be planted very late and will produce a fine fruiting row. They do exceptionally well on heavy ground.

PRICE: 25 for 35c; 100 for \$1.00, prepaid. 1,000 for \$4.50, not prepaid.

BEAVER

Beaver is a new variety which was originated in Wisconsin. It is a very hardy variety, producing a good fruiting row. The berries are of good size, bright red and very firm. It resembles Premier in many ways. In fact it is a cross of Premier and Dunlap. The plant growth resembles Dunlap, while the berry has all of the characteristics of the Premier, but not quite so large. It is a much better plant maker than Premier.

PRICE: 25 for 40c; 100 for \$1.10, prepaid. 1,000 for \$6.50, not prepaid.

PEARL

Without doubt the latest berry in existence, often ripening its berries as late as the Fourth of July. It makes the longest runners of any variety I have ever known. The fruit is everything that could be desired. It is large in size, dark red to the heart, and very firm. Its prominent yellow seeds makes it very attractive to the buyer. When Pearl begins to bear, most other varieties are off the market, and the price received is much higher than mid-season varieties.

PRICE: 25 for 40c; 100 for \$1.10, prepaid. 1,000 for \$6.50, not prepaid.

AROMA

Aroma, like Senator Dunlap, is one of the old stand-bys. It has been a great favorite in the south and middle states.

The berries are light red, always perfectly shaped. The calyx is dark green, giving it a pleasing appearance, making it a good seller.

It is an excellent shipping berry.

PRICE: 25 for 40c; 100 for \$1.10, prepaid. 1,000 for \$6.50, not prepaid.

BLAKEMORE

This variety is one of the newer varieties introduced by the U. S. Department of Agriculture. We do not think it as good as Premier in the northern part of the country, but in the south it has been received with great favor. It produces the most plants of any variety known. The foliage remains green all through the season.

Blakemore is an ideal shipping berry, it ripens early, and is of a rather light color. Success with this variety demands that they be kept thinned. Try a few plants—they may surprise you.

PRICE: 25 for 35c; 100 for \$1.00, prepaid. 1,000 for \$4.50, not prepaid.

FAIRFAX

Fairfax, one of the new berries introduced by the Department of Agriculture, is meeting with considerable favor, especially in the East. The quality of the berry is fine, with healthy foliage. It is well suited for home use, but not quite firm enough for long distance shipping. Fairfax should be tested in every home garden.

PRICE: 25 for 50c; 100 for \$1.25, prepaid. 1,000 for \$7.50, not prepaid.

DORSETT

This is another of the new varieties; it is a berry of high quality, healthy foliage, large in size, rather light in color and well suited for commercial growers. It is one of the heaviest producers, having yielded over 6,000 quarts per acre in the East. You should try a few of these newer varieties—they might just suit your soil and climate.

PRICE: 25 for 50c; 100 for \$1.25, prepaid. 1,000 for \$7.50, not prepaid.

COOPER

Cooper plants resemble Beauty in many ways, but are not quite so large. It does not make a large number of plants, but produces berries of immense size. I would not advise a large planting of this variety, but if you wish to surprise your friends with berries of stupendous size plant a few. It is not suited for long distance shipping, but suitable for near-by markets. Cooper makes exceptionally long roots and is able to produce berries in very dry weather.

PRICE: 25 for 40c; 100 for \$1.10, prepaid. 1,000 for \$6.50, not prepaid.

BEAUTY

Beauty was rightly named. A row of them from a distance resembles a row of potatoes. The plants are immense in size, measuring 15 inches high, with leaves as large as your hand. It does not make many plants, but they produce berries rivaling in beauty those found in pictures. The berries are large in size, dark red, very firm, and remarkable keepers. It is worthy of a trial by all berry producers. Although we do not advise planting them on a large scale.

PRICE: 25 for 40c; 100 for \$1.10, prepaid. 1,000 for \$6.50, not prepaid.

The following three varieties are of somewhat recent introduction. They received a lot of high-powered advertising to which a large number of people fell. They each have some good points, but in other ways they are not so good.

RED GOLD

This variety ripens early, has a fine flavor, the stems are very long; they make plants freely and up to ripening time do very well, but they do not seem able to mature their crop. The foliage does not seem to stand up under the June sun, and the berries remain small and inferior. However, we have some fine plants if you wish to try them.

PRICE: 25 for 30c; 100 for 90c, prepaid. 1,000 for \$4.25, not prepaid.

WASHINGTON

Washington is the sweetest berry we have ever known, and up to the fruiting time gives promise of an exceedingly good crop, but from then on they seem to deteriorate. We do know that far north of us they have produced a fine crop of berries.

We can furnish plants to those who wish to try them. However, we do not recommend them.

PRICE: 25 for 30c; 100 for 90c, prepaid. 1,000 for \$4.25, not prepaid.

HARVEST KING

Harvest King is best suited for localities where the soil is somewhat heavy and where difficulty is experienced in getting a fruiting row. The plants produce a large amount of very sweet berries, but many are inferior in size. The foliage is deficient and many berries sunburn.

PRICE: 25 for 30c; 100 for 90c, prepaid. 1,000 for \$4.25, not prepaid.

REMEMBER

Our quotations in this catalog on Strawberry plants in small lots are prepaid prices.

MASTODON —(Everbearer)

THE WORLD'S BEST EVERBEARER—We hope you will plant some of our heavy-yielding strain of guaranteed true-to-name Mastodon. We grew the largest crop of berries from this strain of Mastodon we have ever had the pleasure to pick and the demand was so great we were unable to supply our trade with these large improved berries.

Mastodon is a strong, vigorous grower, producing big, juicy, sparkling red berries of the most delicious flavor, with a bright green cap, and are firm enough to carry hundreds of miles in perfect condition and command top prices in any market. Mastodon begins fruiting 90 days after the plants are set and keep right on till hard freezing weather in the fall, fruit again with the standard varieties the next spring, and after a lay off of 2 or 3 weeks start fruiting again and with careful attention will produce for another season, or possibly longer. We have selected our plants for the past seven years and now feel we have the best Mastodon plants that can be found. We sold thousands of these plants last year and have a fine supply for the coming season. **PRICE:** 25 for 55c; 100 for \$1.40, prepaid. 1,000 for \$9.00, not prepaid.

HONEY ROCK MUSKMELON

Muskmelons, usually referred to as "Cantaloupes" by the trade, are now being raised in Northeastern Indiana and Northwestern Ohio in large quantities, many growers raising a hundred acres or more. In going through this section you will find most of them raising the new variety called Honey Rock.

Honey Rock is not the earliest muskmelon grown, but is of the most striking appearance, best quality, most productive, and the best shipper of any variety grown. The color is yellow, overlaid with a heavy uniform netting, flesh is dark orange, and the quality is supreme. It matures its fruit in 85 to 90 days from planting.

Seed that is of pure strain, true to type, uniform and of high vitality is the first essential to the growing of a good crop of muskmelons.

We have several hundred pounds of seed grown by the above standard, and we want you to give it a trial this spring and convince you that Honey Rock Muskmelons are far in advance of all other varieties. This section being the home of the Honey Rock you can be assured of the pure strain.

PRICES—oz., 20c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.40, Postpaid.

Black Raspberries

HOW TO GROW THEM. The soil should be well drained, and not too heavy. Prepare the same as for any other berry plants, and plant in early spring. Should be planted in rows 7 feet apart, and about 3 feet in the row, which requires 2,000 plants per acre. For home use and in the garden they may be planted closer. Get the roots well below the surface and cut off the old stock a few inches from the ground. When the new growth reaches a height of about 18 to 24 inches, cut off the tip, which will cause them to throw out lateral branches, and stay more upright. The following spring, before leaf growth starts, trim all lateral branches back to about 8 inches in length, and leave about four good stalks to a hill. When through fruiting, cut out and burn all old fruiting canes.

CUMBERLAND

Cumberland Black Raspberries have been a standard for years in judging other black raspberries, in fact more Cumberlands are planted than all other varieties combined. They are noted for flavor, size and productiveness, and always bring top price on the market. Cumberland has never failed to produce a big crop for us but one year, and that was caused by a very late freeze, but many latent buds brought some fruit. We have sold thousands of Cumberland Raspberry plants in the past and they give perfect satisfaction because they are healthy, heavily rooted, and fresh dug. We never dig our Raspberry plants in the fall because they often become heated in storage and fail to give good results for the planter. Try them—we guarantee satisfaction.

PRICE: 100 for \$2.00; 1,000 for \$13.50, not prepaid.

NEW LOGAN

New Logan is one of the newer varieties but has been grown in Ohio for several years. The canes and berries resemble Cumberland in many respects. The advantages of this variety over others is that it is a week earlier than other varieties and is the most disease resistant of all. Those who have marketed know the advantage of earliness in any product—it brings a much higher price than the later varieties. The berries are large, jet black, and most delicious. Our advice to you is to grow some Logan along with Cumberland and profit by their earliness.

PRICE: 100 for \$2.25; 1,000 for \$15.00, not prepaid.

KANSAS

This variety originated in Kansas and is one of the earliest Black Caps. It is being grown extensively in some parts of the country, but we recommend it highly for any locality. One of the advantages of this variety is it is very hardy and can be grown in any climate—it will not freeze back and has withstood temperatures of 30 degrees below zero without injury. They do not bear as heavy as some varieties, have a short fruiting season, but the berries are of immense size, very black and as sweet as sugar.

PRICE: 100 for \$1.50; 1,000 for \$12.00, not prepaid.

PLUM FARMER

An extra early variety that produces well in favorable years. Plants are very healthy, unusually free from disease. The berry is grayish-black, very firm and attractive. Plum Farmer is extra early and always brings top prices. It tends to produce too many berries, especially for dry seasons.

PRICE: 100 for \$1.50; 1,000 for \$12.00, not prepaid.

CUTHBERT

Red Raspberries LATHAM

This variety originated in the hardy climate of Minnesota and is without doubt the most popular red raspberry grown. It is a strong, sturdy grower, healthy canes and foliage. Latham holds its shape, does not crumble, and has a most delicious flavor. Excellent for table use and jams. Those who are looking for a market berry will find Latham superior to all others. We guarantee our plants strictly true-to-name and free from disease. **PRICE:** 100 for \$2.00; 1,000 for \$15.00, not prepaid.

CHIEF

When looking for an early Red Raspberry stop with this variety, as none other can equal it. Chief was originated in Minnesota; this proves its hardiness. Chief begins bearing before strawberries stop and bridges the gap in berry growing. The outstanding characteristics of Chief are earliness, large size, excellent flavor and disease resistance. The price of Chief plants in the past has been very high, but now they are very reasonable. Try them—they will please you.

PRICE: 100 for \$2.00; 1,000 for \$15.00, not prepaid.

CUTHBERT

Cuthbert is an old stand-by and has been planted for years. It will always be popular. The plants are strong, vigorous growers, having a tendency to branch, which increases the bearing wood. The berries are somewhat cone-shaped, very dark red, and most delicious. They do not bear quite so freely as Latham nor are the berries so large, but when quality is wanted no variety can equal Cuthbert.

PRICE: 100 for \$2.00; 1,000 for \$15.00, not prepaid.

Purple Raspberries

ROYAL PURPLE

This variety is considered the best of purple raspberries. Some people do not like the flavor of purple raspberries, while others are delighted with them. Royal Purple is a strong, upright grower, with very heavy stalks and loads of fine quality berries. The fruiting season is a few days later than the black caps.

PRICE: 100 for \$2.50, not prepaid.

Blackberries

ALFRED

This variety has been on the market only a few years, but in this short length of time has become so popular in many parts of the country that it is fast replacing the old standard kinds. Alfred bears young, producing nearly a full crop of fruit the year after planting. It is a vigorous grower, producing strong, well branched canes, perfectly capable of carrying the big crop of fruit produced. It is perfectly hardy, and can be grown anywhere. The color is a glossy, jet black, and the flavor sweet and delicious.

PRICE: 25 for 75c, prepaid. 100 for \$2.00; 500 for \$7.50; 1,000 for \$15.00, not prepaid.

ELDORADO

This is one of the leading commercial varieties that has long been popular on account of its hardiness, productiveness and freedom from disease, being especially immune to orange rust, the common enemy of all Blackberries. Berries are of good size, color, flavor and quality, holding up well for shipping, and as it fruits over a long season, produces heavy yields that insure a good profit to the grower. There are quite probably more acres of Eldorado now under cultivation than of all other Blackberries combined.

RHUBARB

MYATT'S LINNAEUS—Those who have grown this variety will hardly recognize the old "pie plant". It is an early, tender variety without being tough or stringy, with a mild, sub-acid flavor. A dozen plants are enough for the average family.

PRICE: 6 for 75c; 12 for \$1.00, prepaid.
100 for \$3.50, not prepaid.

ASPARAGUS

MARY WASHINGTON—Wherever possible plant in rows rather than beds. Set out in fall or spring with crowns about three inches below surface of ground, 10 to 12 inches by 2 ft. apart. A bed once made will last for years if properly attended to and well fertilized. We offer only Mary Washington, as it has proven successful in every way, being rust resistant, early, and very tender. We offer heavy roots.

PRICE: 2 yr. old, 10 for 40c; 100 for \$2.00, prepaid.

CURRANTS

PERFECTION—The latest introduction, being a cross between Fay's Prolific and White Grape, combining the best qualities of both. Berry bright red and large. The clusters average longer and the size of berry is maintained to the end of the bunch. In quality it is said to be superior to anything in the market today, being of a rich, mild, sub-acid flavor.

PRICE: Each, 20c; 10 for \$1.90, prepaid.

GOOSEBERRIES

DOWNING—A seedling of Houghton. Large and handsome, pale green berry; of splendid quality for dessert or cooking. Bush vigorous and exceedingly productive. Excellent for family use and profitable for market.

PRICE: Each, 20c; 10 for \$1.90, prepaid.

NOTE

Asparagus, Gooseberry and Currants are prepaid prices.

DEPENDABLE NORTHERN GROWN

Fruit Trees

Why plant southern grown trees when you can get northern trees that will grow, budded from heavy bearing orchards. We are listing the best and most popular varieties. Our prices are less than half the usual prices asked by agents. All trees are 7/16 to 9/16 inch, 2-yr. old, and cannot be sent by Parcel Post; must be sent by Express.

JONATHAN

APPLES

DUCHESS OF OLDENBURG: Summer. Yellow, streaked with red. Its white, juicy flesh and wonderful flavor have made it famous wherever apples are grown. A fine apple both for market and home use.

YELLOW TRANSPARENT. Early bearing variety that has proved both popular and profitable. Fruit large and yellow with crisp, sub-acid flavor.

JONATHAN: Late Fall. Brilliant red, fine grained, white, juicy flesh of excellent flavor. Medium to large size.

DELICIOUS: A Winter Apple. Brilliant dark red shading to yellow at the blossom end. Large to very large with white, tender, juicy flesh of wonderfully rich sub-acid flavor.

GRIMES GOLDEN. Winter Apple; skin golden yellow; delicious, sparkling flavor that cannot be described. Tree very hardy and productive.

We have many other varieties of apples.
Write for prices on large lots of trees.

PEARS

BARTLETT. The most popular Pear for home use and market, a leader among canning Pears. Should be in every garden and orchard. Large, golden yellow with reddish blush on the sunny side.

We can also supply you with **Duchess, Kieffer and Seckel Pears.**

PLUMS

GERMAN PRUNE. The most delicious of all Plums. Extra large size, often two inches in diameter. Early and abundant bearer. Combines hardiness, immense size, delicious quality, long keeping, beautiful color.

Also **Green Gage** and **Japan Plums.**

SOUR CHERRIES

LARGE MONTMORENCY. Best late Sour Cherry, ripening about ten days later than **Richmond.** The fruit is extra large, bright red, firm and fine for shipping.

EARLY RICHMOND. Medium size, dark red; acid flavor. One of the most popular sour Cherries, and is unsurpassed for cooking purposes. Very hardy. Ripens in June.

SWEET CHERRIES

BLACK TARTARIAN. The popular, Sweet Cherry with dark brown, nearly black color. Extra large fruit. Flesh solid, fine flavor. One of the best Cherries for shipping and canning.

We can also furnish **Royal Ann**, a yellow sweet cherry.

Trees Must Be Sent By Express

PEACHES

ROCHESTER. An unusually early free-stone peach of wonderful sweetness. Ripens in early August. Hardy and prolific. Keeps and ships well.

ELBERTA. Large to extra large. Free-stone. Golden yellow flesh, red at the pit, firm, juicy. Has no equal as a prolific bearer.

J. H. HALE. Yellow, extra large, globular; thick skin; colors to a rosy tint. Deep yellow, fine-grained, very firm flesh of excellent quality.

SOUTH HAVEN. A new sort with exceptionally fine flavor. Flesh yellow and sweet. Its showy exterior combined with its earliness makes it a real money-maker.

We can supply you with many other varieties of fruit trees.

SUPERB APRICOT

The best Apricot on the market. Tree grows large and spreading and is immensely productive of beautiful orange colored fruit with firm flesh and excellent flavor. Two or more trees should be planted as they are only partly self-fertilizing.

Fruit Tree Prices on Page 13

CONCORD GRAPE

GRAPES

CONCORD, The Standard Commercial Grape. The fine old popular market variety and the leading commercial grape of today. A large, purplish black grape, very hardy and productive.

MOORE'S EARLY, The Old Favorite Early Grape. Ripens about a week or ten days earlier than the Concord and is fully as good in quality. The berries and bunch are extra large, fruit is very sweet and fine flavored.

NIAGARA, The Leading White Grape. This is the best of all white Grapes, and is very similar to Concord in habit of growth and bearing. Fruit a light amber color, with light bloom.

DELAWARE. The red table grape is one of the most delicious of all grapes, but rather small.

PRICES ON GRAPE VINES

Each 20c; 12 for \$2.00, prepaid.

Roses

HARDY NORTHERN GROWN ROSES—ROSES YOU WILL LOVE

PAUL NEYRON

Hardy Climbing Roses

CRIMSON RAMBLER. Very hardy. Blooms are of fiery red color and in clusters the whole length of the vine.

DOROTHY PERKINS. Pink. The best pink and a profuse bloomer. Double and sweet scented.

DR. W. VAN FLEET. Blossoms extra large. In color a delicate flesh-pink changing when full blown to a flesh-white shade.

CLIMBING AMERICAN BEAUTY. Flowers of large size, good form, of rich, red color passing to crimson. Very fragrant. Good foliage and absolutely hardy.

BABY RAMBLER. We have Baby Rambler. It is in bloom all the time, flowers in large clusters of bright crimson. It grows to a height of eighteen inches and hides the plant with its bloom.

PAUL'S SCARLET. The most intense red Rose that grows. By far the finest red climbing Rose with long strong canes. Never fades out in the hottest sun, retaining its vivid and brilliant color at all times.

PRICE OF ROSES: Each 35c, 5 for \$1.50.

Hybrid Perpetual Bush

PAUL NEYRON. Peony rose. The largest rose of all. Blossoms of clear pink shading to rose. Plant erect, strong and heavy grower, blooming repeatedly.

FRAU KARL DRUSCHKI. Very large; perfect form and snow white; vigorous grower, a free bloomer.

AMERICAN BEAUTY. H. T. Deep pink, approaching crimson color. Exquisite form and fragrance, large blossoms. A prize winner.

PRESIDENT HOOVER. A new rose with large flowers of a very charming combination of cerise-pink, flame, scarlet, and yellow, with broad, thick petals, retaining this characteristic for days after the flowers have opened; very fragrant.

SOUV. DE CLAUDIUS PERNET (Pernetiana). The most satisfactory yellow Rose ever produced. Flowers are a strong, sunflower-yellow, even deeper toned at center. In growth it is vigorous, erect and branching, with brilliant foliage and almost thornless stems.

TALISMAN. One of the most vividly colored roses ever introduced. Brilliant red and gold buds, opening to well-shaped, double bloom of scarlet-orange and rich yellow. It has fine green foliage and is a free bloomer.

SPIREA VAN HOUTTEI

Northern Grown Shrubs

Shrubs here offered are all hardy, thrifty, two-year-old stock, 18 to 24 inches high. However, we can supply either larger or smaller size. The larger size sells at somewhat higher price and the smaller much lower.

In case you are planting a large amount of Shrubs get our price first. We can save you money on a large order.

SPIREA VAN HOUTTEI. Finest of all the Spireas, giving a most graceful appearance when out of bloom. The flowers are pure white, and borne in dense clusters along the whole length of the branches.

SPIREA PRUNIFOLIA. (Old-fashioned Bridal Wreath.) Strong, irregular, growing; shining leaves coloring in autumn, and diminutive, very double, rose-like flowers borne in great abundance in April and May. Grows 6 feet tall.

SPIREA FROBELI. Similar to the Anthony Waterer, stronger growth. Flowers pink.

SPIREA ANTHONY WATERER. A dwarf variety, growing 15 to 20 inches high, covered with large heads of crimson flowers. Foliage is very handsome, being variegated with creamy white or yellow.

SPIREA PRICES

3 year old clumps, each 35c; 3 for \$1.00

18-24-in. clumps, each 25c; 3 for 50c

Not Prepaid

HEDGE PLANTS

AMoor RIVER PRIVET. Hardest of all Privets. Foliage dark, glossy green, not subject to blight. Resistant to insect pests. Leaves retained far into the winter. White flowers followed by berries.

3 Cane, price, each 10c; 10 for 75c

Not Prepaid

JAPANESE BARBERRY. The Improved Thunberg's Barberry that is entirely free from rust and may be planted in any state. A beautiful plant, whether used for group planting, shrub masses, or hedges. Foliage bright green, turning to reddish bronze in fall.

12-15-in. PRICE, each 10c; 10 for 75c

Not Prepaid

BERBERIS-BARBERRY. (Red Japanese Barberry). This shrub fills a long-felt want. Red Japanese Barberry may be used for shrubbery border, for clumps, or even as a specimen shrub.

9-12-in. PRICE, each 25c; 10 for \$2.00

Not Prepaid

SHRUBS

ALTHEA. (Rose of Sharon)—Handsome late summer blooming shrubs, coming into bloom when few shrubs are in flower. Large showy flowers.

BUDDLEIA. Butterfly Bush. Will mature to full size the first year. Branches usually freeze back during the winter, but the new growth starts readily from the roots the following spring. 4 to 5 ft. high, with spikes of bluish violet flowers.

DEUTZIA. Pride of Rochester. Large double rose like flowers in June. It excels all other sorts in size of flowers, profusion of bloom and vigorous in habits.

DEUTZIA GRACILIS. Dwarfest growing of all Deutzias; dense and bushy. Its drooping branches are wreathed with pure white flowers in May.

DOGWOOD. Red Twig Dogwood. A very hardy, thrifty shrub, doubly attractive because of its creamy white flowers in early summer followed by clusters of white berries, and its very conspicuous blood-red branches throughout the winter.

YELLOW TWIG DOGWOOD. Bark is striking yellow color throughout winter. An excellent shrub for winter effect.

FORSYTHIA. Golden Bell. One of the earliest shrubs to blossom in spring. Branches are covered with golden yellow flowers before leaves appear.

HONEYSUCKLE. Tartarian. The best of all bush Honeysuckles, upright spreading branches, bright green foliage, bright pink flowers in May and June, followed by showy red berries.

HYDRANGEA ARBORESCENS. Hills of Snow. The flowers are in a large way similar to the familiar "Snowball" in appearance; conspicuously white and imposing.

HYDRANGEA. Paniculata Grandiflora. One of the finest and most popular shrubs grown. Blooms from August until frost, flowers in large panicles.

KERRIA JAPONICA. Flower, golden yellow and blooming profusely in the spring and more or less all summer. A striking flower and in the winter the slender branches are bright yellow. One of the most desirable shrubs.

LILAC. Persian Purple. A thrifty growing bush with slender leaves and deep purple flowers.

MAHONIA AQUIFOLIA. A hardy evergreen shrub having holly-like leaves. Can be used in evergreen and shrubbery planting and will do well in partial shade.

PHILADELPHUS. Golden Leaf Mock Orange. Dwarf compact habit with bright golden leaves that are most attractive. The blossoms are white.

SNOWBERRY. Common Snowberry. White. Small rose colored flowers in June and July, followed by large clusters of milk white fruits, which remain far into the winter.

SNOWBERRY, RED. Often called Coralberry. Similar to White Snowberry but with red berries clustering in ropes along the weighted down stems. Grows 2 to 4 feet tall.

TAMARIX AFRICANA. Tall shrubs, 8 to 10 feet high, with fine feathery foliage and small, bright pink flowers, in slender racemes in April and May. Splendid for planting in damp or other places.

WEIGELA FLORIBUNDA. A beautiful, comparatively new shrub, with large, showy red flowers appearing in profuse clusters and almost hiding the glossy green leaves. Commences blooming early in spring, and continues all summer.

WEIGELA EVA RATHKE. A charming new variety, reaching a height of 3 to 4 feet. Flowers are a brilliant crimson.

PRICE: 3 yr. old Clumps, each 35c;
3 for \$1.00.

18-24 in., Each 25c; 3 for 50c,
Not Prepaid

HART'S

Perennials

HARDY FLOWERS

Your yard or flower garden is not complete unless you plant several beds of perennials. These flowers bloom year after year without replanting. They die down in the fall and send new shoots from the roots in the spring. Very little protection is needed to keep them from freezing out in the winter. Our plants are strong, healthy plants, and most varieties will bloom the first year and continue to do so as long as they are cared for. The varieties we list here are standard varieties that have proven satisfactory in this climate and are sure to satisfy.

TRITOMA

TRITOMA (Red Hot Poker). Pfitzeri. Rich orange scarlet blooms with stems 3 ft. high. Very attractive for massed planting or in single plants. Also fine for cutting. The blooms are formed of a solid spike of bright orange red. The flower stems grow 2 or 3 ft. tall. Blooms from August to October.

BLAZING STAR, Gay Feather. A perfectly hardy perennial of luxuriant growth, doing well in any kind of soil, poor or rich, moist or dry. Produces richly col-

ored purple flowers on stout stalks 5 to 6 ft. high in graceful spikes a foot long. Blooms in July and August.

PLATYCODON. (Balloon Flower). June to October. Large, showy, deep blue flowers. Good for rock garden and border.

AQUILEGIA, Columbine. Mrs. Scott Elliott Hybrids. One of the most beautiful hardy perennials. The peculiarly shaped flowers are borne on slender, graceful stems well above the handsome foliage. Plants grow 2 or 3 feet high. Blooms in May and June.

HIBISCUS. Large, single, light pink flowers, which measure from 5 to 10 inches in diameter, and grow profusely along the stem. Blooms from early July until frost. Plants grow from three to five feet tall under ordinary circumstances.

SWEET WIVELSFIELD. Similar to Sweet Williams but hardier. They grow in large clumps and are just covered with bloom nearly all summer. They grow about a foot and a half high. They come in mixed colors.

GAILLARDIA. (Blanket Flower). Flowers are of the most gorgeous coloring. Center dark brown. Plants marked with brilliant crimson orange and vermillion. Blooms all summer.

COREOPSIS. Large golden yellow fringed flowers on long wiry stems, fine for cutting, and blooming practically all summer. One of the showiest and best of all perennials. They grow about 2 ft. high. Blooms all summer.

GYPSOPHILA. Hardy Baby's Breath, *Paniculata Single*. Immense panicles of delicate white gauze-like flowers from June to August. Very desirable for mixing with other cut flowers. Perfectly hardy and easily grown. 2 ft.

HARDY CARNATION. Red Grenadin. These plants are quite hardy, requiring protection only in exposed locations. The large, double flowers are of rich dark red color.

DELPHINIUM. Hardy Perennial Larkspur. It is almost impossible to convey anything like an adequate description of the improved Delphiniums. Their greatest charm lies in the wonderful stateliness of growth, and the rich colors and tints of their striking flowers. Nothing in blue can compare with Delphiniums, and for their value in hardy borders they are unsurpassed.

PYRETHRUM. Painted Daisy. Most attractive hardy perennials which have become very popular. Valuable border plants with many stems about 2 ft. high, each surmounted with handsome flowers in the brightest shades of rose, flesh-pink, crimson, etc. It blooms from May to July.

SHASTA DAISY. This magnificent white daisy is the largest flowered of its class, blooms frequently measuring 6 inches across with very broad petals of great substance. 2½ to 3 ft. Splendid for florists.

ELDER DAISY. Very valuable early variety as you can cut flowers in May for Memorial Day. Flowers not quite as large as Shasta but more are produced on each plant.

All Perennials are field-grown, 2-year plants; 20c each; \$1.50 per dozen, prepaid.

AQUILEGIA

HARDY PERENNIAL PHLOX

One of the most useful flowers for summer decorations. Colors vary from pure white to deep crimson. Exceedingly hardy. Once planted, they require no further attention for several years, but it is advisable to renew them about every fifth year. They flower from early July to middle of September, and 1 to 4 ft. tall.

Athis—Salmon.

B. Comte—A beautiful French purple.

Eclairer—A dark red.

Fernand Cortez—Scarlet.

Marshal French—Cherry-red.

Millie Hoboken—New bright pink.

Rijnstroom—Bright crimson pink, immense flowers.

Rosenberg—Purple.

R. P. Struthers—Carmine with red eye.

Sunset—Color of the sunset.

Widar—Purple with white eye.

Windot—White with red eye.

PRICE—Large field-grown clumps ready to bloom: Each 15c; 12 for \$1.50. Prepaid.

Rock Garden Plants

PHLOX, Amoena. Dwarf growing plant which spreads over rocks forming a dense mat which is covered with pink flowers during April and May. Foliage is deep green.

PHLOX, Sublata. Just the plant to use in cemetery work as it is in full bloom on Decoration Day. The plant is so entirely covered with delicate pink star-like flowers during full bloom that the light green moss-like foliage is entirely hidden.

GYPSOPHILIA, Repens. Dwarf growing form of the popular Baby's Breath. Light green foliage. Has white single flowers covering plant during June and July.

VERONICA, Spicata. Erect growing plant bearing beautiful blue flowers in June and July on spikes which protrude through the dark green foliage.

DIANTHUS, Deltoides. One of the delightful pinks bearing red or pink flowers, has dark green foliage. In height 1 ft. Blooms in May and June.

DIANTHUS, Plumarius, or Grass Pinks, the kind our grandmothers used to raise. The flowers vary in color but generally have a white border and pink center.

FESTUCA-GLAUCA (Blue Fescue). This is one of the most unique rock plants that grows. This little tufted grass has silvery blue foliage. The plants are evergreen.

SATUREIA (Calamintha) Alpina. Small green-leaved foliage, bearing small rosy-purple flowers. Grows 8 in. tall.

CERASTIUM, Tomentosum. (Snow in Summer). Low growing silver foliaged, dense growing plant, bearing myriads of small white flowers in June.

CESRASTIUM, Arvense. Low growing, green-leaved plant, which stands hot, dry weather. Slow spreading variety.

IRIS, Pumila. These beautiful little Irises do not grow over 4 inches high,

and bloom in April and May. They are fine for bordering flower beds or planting in front of the tall Irises.

SEMPERVIVUM—Hen & Chickens. Pale green leaves surrounded by small rosette like offshoots. Stands hot, dry weather better than any other variety and is used in flower boxes for decorative purposes.

SEDUM, Stahli. One of the best sedums. Slow spreading. Beautiful green in summer and red in winter, has small white flowers on short stems.

SEDUM, Fostorium. Blue-green, slow-spreading sedum; very different from other varieties.

SEDUM, Sarmantosum. Fast-growing, having light green foliage and yellow flowers.

SEDUM, Acre. Yellow blooms from May to July. Slowly spreading plants with attractive deep green, fleshy, small leaves.

SEDUM, Spurium Coccineum. Beautiful rosy crimson flowers during July and August. Of creeping habit; 6 inches.

SEDUM, Album. A dwarf, spreading plant with thick, waxy foliage. Pure white flowers in July.

SEDUM, Sexangulare. Very much like Sedum Acre, but with brown foliage. Vivid yellow flowers.

THYME, Blue. Thyme of any variety is the most beautiful creeping plant that grows. It is the same color both winter and summer. It spreads slowly and is very hardy. The foliage is a decided blue color.

THYME, White. Green foliage, having tiny white blossoms in July and August, otherwise same as Blue Thyme.

THYME, Purple. Same as White Thyme, except it has purple flowers in place of white.

All Rock Plants 2 yr. old; Each 15c; 3 for 40c; 12 for \$1.50, prepaid.

SPECIAL ROCK PLANT BARGAIN

20 Rock Plants for \$2.00, Prepaid.

Our selection. We will select 20 good plants, consisting of from 6 to 12 good varieties on this list, all named and labeled, to assist those of our customers who do not know the best Rock Plants to order.

Instructions to Customers

It has always been our desire to give every customer prompt, efficient service and you can aid us greatly in doing this if you will exercise care and accuracy in making out your order.

Our ideal location and soil enable us to start digging and shipping a week to ten days earlier than most northern nurseries. There are no storage cellars on our farms. All stock is fresh dug as needed.

WHEN TO ORDER—As there may be a shortage of the particular varieties you want it is best to make up your order and send it in as quickly as possible. Stock will then be reserved and shipped at specified time. Strawberry and Raspberry plants are a short crop in many localities this year and for your own protection this stock should be ordered early.

HOW TO ORDER—An order blank is provided with each catalog. However, any ordinary writing paper will do. In order to save unnecessary correspondence, always give complete name and full address, shipping point, etc.

TERMS OF PAYMENT—Our low prices for high quality stock are for cash only. Please do not request C. O. D. shipments. We will book early orders with a cash payment to show good faith, and balance may be remitted before shipment is wanted.

REMITTANCE—The safest way to remit is by postal or express money orders. Cash may be sent in registered letters and personal checks will be accepted if carefully made out. Please do not send stamps.

OUR REFERENCES—Farmers & Merchants State Bank, Spencerville, Ind., the Post Master, Express Agent, or any business house in Spencerville, Ind.

SHIPPING SEASONS—Spring shipping season usually begins in March and continues until June.

HOW TO SHIP—Large tree and cane plant orders can be shipped safely early in the spring by freight. Order shipment in March and trench or heel in the stock until you are ready to plant. For Strawberry plants and small orders of other stock, express or parcel post shipment is necessary. If not particular, tell us to ship "cheapest way."

SAFE ARRIVAL GUARANTEED—All stock guaranteed to reach you in perfect condition, as we use plenty of damp moss, waterproof paper and strong, wire-bound crates and boxes.

IN CASE OF ERROR—We are not satisfied until you are. As soon as stock arrives check it over carefully and in case of error notify us immediately and same will be corrected.

**Certificate of Nursery Inspection**

The Department of Conservation, Division of Entomology

No. 415

Indianapolis, Indiana, Date Oct. 22, 1934

This is to Certify that the nursery stock grown by Clyde Hart & Son located at Spencerville, Indiana, consisting of 17 acres, has been inspected by the undersigned or his authorized representative, on August 17, 1934, in compliance with Chapter 177, page 291, Indiana Acts of 1907, and has been found apparently free from destructively injurious insects and plant diseases.

This certificate covers General Nursery Stock and is valid unless revoked for cause, until August 1, 1935.

Signed FRANK N. WALLACE,  
State Entomologist.

●●●  
**NON-WARRANTY**

While we take every precaution to have all plants absolutely true-to-name, it is understood between the purchaser and ourselves that should any prove otherwise, we shall not be liable for more than the first cost of plants. We agree to deliver plants in satisfactory growing condition, but will not in any way be responsible for growth of same.

# Gladiolus

We are presenting for your consideration twelve of the most valuable gladiolus. We raise many varieties and can supply you with most any variety, but these twelve are outstanding for beauty and cut flowers. The bulbs we send you are not small sized, but range from 1¼" to 2". They are also free from thrips.

A prize winning bouquet of W. H. Phipps' gladiolus shown at DeKalb County Fair held at Auburn, Ind., in October, 1934.

## ALPINE MIXTURE

This collection is made up of many varieties, all large No. 1 Bulbs. A wonderful collection of varied colors of beauty.

12 Bulbs for..\$ .35

25 Bulbs for.. .65

50 Bulbs for.. 1.25

100 Bulbs for.. 2.00

All bulbs will be sent to you early in the spring, delivered by prepaid parcel post.

**W. H. PHIPPS.** The masterpiece in Gladiolus. LaFrance pink overlaid with light rose salmon lighter toward the center. Lower petals fairly striped and speckled with ruby. Flowers enormous. It is a tall grower and will open up to 20 blooms at once. Truly the wonder glad.

**GLORIANA.** Golden Salmon with clear yellow throat. A rose bud type. Stems are tall and makes most beautiful bouquets. It is a beauty and should be planted by all lovers of beautiful flowers. This variety will not disappoint you.

**MRS. LEON DOUGLAS** Blooms of brightest begonia-rose striped with soft orange-scarlet.

**LOS ANGELES** Has earned the name "Cut-and-Come-Again" Gladiolus. Loveliest showy shrimp-pink with orange-carmine markings in the throat.

**GOLDEN DREAM.** Very beautiful clear, deep yellow. Several blooms open at once. Very tall, straight, vigorous plant.

**MRS. DR. NORTON.** Immense flower, creamy white overlaid or tinted soft pink, end of petals showing a charming picotee of deeper pink.

**ORANGE QUEEN.** A lovely copper orange, one of the best for cut flowers.

**CRIMSON GLOW.** The name is the best description of its color. It has straight spikes of many flowers, which open 4 or 5 at once.

**ALICE TIPLADY.** A large, open flowered Primulinus. Saffron orange in color. The lower petals slightly lighter in shading. One of our most popular varieties.

**PEACE.** This is a large, late white. Has just a slight Tyrian rose blotch on the petals, is very tall and straight.

**GOLD EAGLE.** Beautiful ruffled variety of a clear deep yellow color.

**SHELIA.** Light coral red fading to flesh pink in throat.

**PRICE:** Each 7c; 12 for 75c; 100 for \$3.00, postpaid.

# **P R E M I E R**

**The Most Profitable Strawberry**

## **FOUR THINGS TO REMEMBER**

1. Remember we specialize in the growing of Strawberry and Raspberry plants.

2. Remember we are willing to let you compare our plants in quality and price with any others.

3. Remember we are in the heart of the Middle West and the time and cost of getting plants to you is less.

4. Remember we are not bragging about the beauty of our catalog, but it is home-made and tells the truth.

**HART'S NURSERY - - Spencerville, Indiana**
